

# Planet Supra™

## nano thermal barrier paint

- ✓ reflects 94.6%\* solar radiations
- ✓ instantly saves on energy bill
- ✓ applicable on most surfaces
- ✓ certified to offset carbon emissions

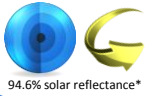

# high-performance green technology

Insulating Nano Silica Beads

## Ultra-Fine Hollow Nano Silica Beads

form a radiant barrier that reflects heat back to its source. Gapless lifelong performance.

Near IR Far IR UV

## World-Class Solar Radiation Reflectance

a wide spectrum of solar radiations are reflected, the paint offers a best-in-class insulation as per JIS\*.

TiO<sub>2</sub>

Nano Titanium Dioxide

## Lifelong Self-Cleaning Effect

daylight reacts with Nano Titanium Dioxide, breaks dirt and pollution molecules. Rain washes them off.

## Extreme Durability in All Seasons

the paint does not peel, fade, swell, craze. It is very resistant to abrasion, sea salt and even acid.

Mold Fungus Algae

## Green Pollutant-Free

the paint's composition makes it unattractive to mold, fungus or algae which do not grow on it.

Smart Green Solution

## 100% Eco-Friendly Composition

all components have been chosen to protect the environment: water-based, no VOC, no solvents.

Offset your Carbon Footprint faster than by planting trees!

1 ton

Planet Supra™ is the first coating certified to offset carbon emissions by Carbon Offset Japan (COJ).

For every 10 cans used, the Japanese Government grants **1 ton of Carbon Emission Reduction credits (CER)** to the manufacturer for its contribution to fighting Global Warming.

One ton is same amount of carbon that is offset by **six adult 25 years old pine trees** or **thirty-six adult maple trees!**

## Product range and technical characteristics

Per can of paint	Finish	Weight	Liters	Coverage area, 2 coats	Thickness of 2 coats	Primer required	Compatible surfaces	Application methods
Planet Supra	Matte	10 kg	15.4 L	40 SQM	200 microns	No	Concrete, metal, wood, fabric, plastic, brick, ceramic, cement, clay, old and new, ...	Roller, airless spray gun, spray gun, brush, ...
Planet Supra Neo	Glossy	16 kg	15.4 L	65 SQM	150 to 200 microns (incl. primer)	Yes, any type		

## Versatile application

Planet Supra is compatible with all painting methods: brush, roller, spray gun, mechanical and industrial.

## Fast curing times

Dry to touch	Half cured	Cured
30 min.	8-12 hrs.	48 hrs.

## Easy painting process

Planet Supra	Planet Supra Neo
1. Clean surface	
2. Mix with 5% to 10% demineralized water	
3. Paint 2 coats	3. Apply primer
	4. Paint 2 coats

## Wide color palette, in matte or glossy finish

WHITE	GL-N50	OR0560	OY1780	YL2790	PA7670	GR3980
	GL-N70	OR0780	OY1990	YL2780	BL7270	GR3970
		OR1980	RD1270	YL2785	BL7240	PA7660
		OR1770	RD1260	OY1770	BL7250	PA7650

Base colors:

Planet Supra: matte white

Planet Supra Neo: glossy white, glossy light grey

Custom-made colors are available on order.

Heat reflective performance is best with lighter colors.

\* JIS R 3106:1998: Japanese Industrial Standard certification.
