

# Spotless™ Fabric & Leather nano long term protection

Ref.1009 - Brochure

**Invisible German nanotechnology water and oil-repellent sealant for fabric and leather: long lasting protection, easy to clean, environment-friendly.**

## Nanotechnology water-repellent protection:

Nanotechnology is the latest revolution in fabric and leather protection.

It makes the material water and oil-repellent for up to one year while allowing it to breathe. Fabric and leather lifespan is increased, less water and chemicals are needed for cleaning.

## Main benefits

- ✓ liquid-repellent protection that allows fabric to breathe
- ✓ protects the environment: does not contain harmful chemicals, reduces water and cleaning products usage
- ✓ lasts up to 12 months, even outdoors
- ✓ resists to 15 washing cycles at 40°C

**Composition:** aqueous preparation.

**Color:** transparent. **Odor:** none. **pH:** 5

**Packaging:** 1L to 1,000L containers.

**Shelf life:** up to 1 year, store in dry place away from direct sunlight.

## Application

The product is ready to use, do not dilute.

Spray evenly on fabric until saturation or immerse the fabric completely in the liquid.

Drying time is 30 minutes at 20°C ambient temperature. Can be dried mechanically.

## Maintenance

Clean sealed fabric surfaces with water spray or wet cloth. The treatment resists to low water spray pressure. Do not use surfactants or oily cleaning products. It is recommended to use Spotless EasyCleaner (ref. 10020) to remove persistent stains.

## Recommended applications

**Car seat, couch, chair:** protection from coffee spills, easy to clean with wet cloth only.

**Convertible soft-top roof:** rain leaves no stains when drying, roof is easy to clean, lasts longer.

**Clothes, uniforms, gowns:** military, police, hiking, outdoors sports, industrial environments, ...

**Outdoors equipment:** tents, fabric roofs, ...

**Hand bags, shoes, umbrellas, leather and fabric fashion accessories,** ...
