

# Spotless Fabric EasyCleaner Nano Stain Remover

Removes persistent stains thanks to a Nano Micro-division process. Brakes down dirt on molecular level, making fabric easy-to-clean.

Ref. 10020. Stain remover which does not contain any surfactants, detergents or solvents, for fabric and leather: clothing, automotive seats, bags, upholstery, carpets, ...

## Nanotechnology: the latest technological breakthrough

Nanotechnology has revolutionized most industries. Nano provides a higher quality finish, more benefits and a longer lifespan than traditional silicon based waterproofing solutions. The Spotless range is manufactured at nano scale in German high tech laboratories. Their high concentration of nano particles provides spectacular results.

## Usage

Simply spray on dirt patches, let it work a few minutes then wipe with a clean dry cloth. For persistent stains use a soft brush. Repeat application until stain has been removed.

**Composition:** salty aqueous preparation. **Smell:** none. **Color:** transparent **pH:** 8

## Surface preparation

None necessary, it is recommended to test first on a small area.

## Application

The product is ready to use, do not dilute. Shake well before use. At ambient temperature it dries in 30 sec.

## Quantity required

Depending on how absorbent the fabric is, required quantities vary from 10 to 25ml/sqm.

## Storage

Shelf life 1 year minimum when stored in original un-opened container, between 5°C and 25°C, away from direct sunlight. Do not store in metal containers as there is a risk of corrosion.

Spotless Fabric EasyCleaner is not labeled as dangerous goods and is perfectly safe to use. See the MSDS for complete safety information.
